2 Awesome Mythical Creatures

By: Jairaj Sharma

1. PEYRTON

THE PEYRTON RESIDES WITH THE FEATURES OF A BIRD AND A STAG (AS SHOWN IN THE PICTURE BELOW). IT IS A MAGICAL BEAST THAT ORIGINATED FROM THE MEDIEVAL EUROPEAN BESTIARIES. THE ANTLERS OF THIS BEAST ARE FEARSOME. IT HAS TALONS SHARPER THAN RAZOR SWORDS LOCATED ON THE HINDQUARTERS. THESE WOULD BE WONDERFUL TO RIDE OUT INTO BATTLE!

2. BAKU

THIS CUTE FURRY CREATURE HAS WEIRD, BUT BENEFICIAL POWERS. THIS BEAST FEASTS UPON YOUR NIGHTMARES. THE BAKU IS CALLED A CHIMERA, A CREATURE THAT HAS SO MANY ANIMAL PARTS THAT IT IS INDEFINABLE. FOR YOU POKEMON AND YO-KAI LOVERS, A BAKU HAS AN ANIMAL BASED OFF OF IT IN EACH OF THESE GAMES. BAKU FOR YO-KAI, AND DROWZEE FOR POKEMON.

Suggested Game: ROBLOX

By Brett M.

Roblox is a game that is accessible to anyone with a PC (the P stands for personal, and C stands for Computer) or other any other devices. It's a game where you have an avatar, username, and an account. You go around playing games within the game as well. If someone likes your skills, they can send you a friend request. Then you can have your own personal online friendship club! Heh heh, just kidding. But there is a friends list, with people who think you are awesome! Each game has a different style and rules. There's "Robux" which you can use to buy accessories for you avatar!

The Thing About Valentine's Day

By: Ellie King

Valentine's day. A day about love and happiness. But where did it come from? Valentine's day is actually supposed to be called Saint Valentinus day. Saint Valentinus was a christian man who did weddings for soldiers who were not allowed to marry. After people found out about this, he was imprisoned and sentenced to death. Before he was executed, he wrote his daughter a note and it was signed " From your Valentine," He was buried on february 14th, a day that we now call Valentine's day. Valentine's day was not associated with love until the middle ages. Then folks started to write love notes and give special treats to their loved ones. On that day, love is all around us. So go, express it in your own way.

Don't forget to come to the Valentine's dance on February 14th, for grades 3-6. Students in grades K-2 are welcome to join us at Jump On In down the street for some quality jumping time!

Ask Ellie!

Dear Ellie,

I have a friend that lies to me and I don't know what to do. Please help.

Sincerely,
Two heart broken friends

Dear Two heart broken friends,
Check if your friend's okay. She might be uncomfortable telling you something. She might want some alone time. If you think it would be helpful, ask her calmly why she's lying, and explain that her lying upsets you.

Sincerely,
Ellie King

Dear Ellie,

Me and my friend have been friends for a long time and now she keeps ignoring me please fix this.

Sincerely,
Lonely

Dear Lonely,

Walk up to your friend and ask her what's up. You never know, she might think that you're ignoring her! If she still ignores you try a joke or a song.

Sincerely,
Ellie King

Next week if you want more advice, Put your advice in the orange folder outside of the computer lab!

Thank you! Sincerely, Ellie King

Teacher Spotlight: Mrs. Williams

Interview by: Autumn and Ellie

We asked Mrs. Williams, Do you have any experience with being a leader? She replied, "I have been a high school representative and a teacher for eleven years." That's neat! I see that you really enjoy teaching. We also asked, what is your favorite part of your job? Mrs. Williams returned, "Working with students in all grades." Mrs. Williams will always be kind and caring to us students. For the finale question we asked, How would you compare this school to other schools? Mrs. Williams wisely replied, "Micro makes this school unique. Also, marketplace is very exciting."

We would like to thank Mrs. Williams for her time and her meaningful responses! It means alot to us!

LET'S TURN THE WORLD KIND!

Random Acts of Kindness week (#RAKWeek2017), Feb 12-18, is an annual opportunity to unite through kindness. Formally recognized in 1995, this seven-day celebration demonstrates with one act - one smile, one coffee for a stranger, one favor for a friend. It's an opportunity for participants to leave the world better than they found it and inspire others to do the same... What will your RAK be? Stay tuned...

Survey Spot!

Survey's taken by first and second graders at MACS, data collected and analyzed by Riya, Anjali, Vanessa and Avighna.

What is your favorite TV Show?

Shows:		Votes:
Sponge Bob:	25%	5
Saving Santa:	10%	2
Ice Age:	40%	8

SPORTS CORNER

By: Xavier Lopez

This issue I am writing about football.

Our home team the New England Patriots are going to the super bowl! They beat the Pittsburgh Steelers by 19 points for the super bowl slot, the score was NE-36 PT-17. Green bay packers were beaten by the Atlanta Falcons 44-21. Now the Falcons got the second slot to the super bowl. The super bowl will be held in Houston, Texas on February 5th at 6:30. Who do you think will win? Quinlan says that the Falcons will win "I think the Falcons will win because Tom Brady will get injured." And also Steven said, "That the falcons work together more well than the Patriots." Arav thinks that the Patriots will win "Tom Brady's an awesome QB and Julian Edelman is a great WR" In a survey of 40 votes 31 of them were for the pats, 9 in favor of the falcons. As the super bowl gets closer who do you think will win? Check off your favorite team below.

Atlanta

Patriots

PLANETS

By: Mellanie Bean

A lot of people love space as we all know. But if they love space, they must love the planets. Our main eight planets, Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, and Neptune have so much to them. What they are made of, how big they are, well I'm here to tell you about that. Our first planet, Mercury, has a diameter of 4,879km, it's distance from the sun, 57,909,227km (0.39 AU) and its orbit period is 88 days.

Venus's diameter is: 12,104km, distance from the sun is: 108,209,475km (0.73 AU), and its orbit period is 225 days.

Earth's diameter is: 12,104km, distance from the sun: 149,598,262km (1 AU) and it's orbit period is 365.26 days.

Mars's diameter: 6,779km, distance from the sun is: 227,943,824km (1.38 AU), and its orbit period is 1.9 years.

Jupiter's diameter: 139,822km, distance from the sun is: 778,340,821km (5.20 AU) and it's orbit period is 11.9 years.

Saturn's diameter: 116,464km, distance from the sun is 1,426,666,422km (9.58 AU), and it's orbit period is 29.5 years.

Uranus's diameter: 50,724km, distance from the sun: 2,870,658,186km (19.22 AU) and it's orbit period is 84.0 years.

Last but not least, Neptune's diameter is 49,244km, it's distance from the sun is 4,498,396,441km (30.10 AU) and it's orbit period is 164.8 years. Now some of you may say, "But what about Pluto?" Well I'll answer that for you.

Pluto is in fact NOT a planet. That's right, it's not a planet. People call it "The Dwarf Planet" because it has not yet cleared its orbit or it's just small. Next article, scientists might have found...

Another Earth.

All About Animals!

Ostriches

By: Autumn Rice

What's that roaming around in the desert lands? It's the world's largest bird, an Ostrich! The Ostrich has a very unique look with their very long necks and legs. A male Ostrich can reach to over 9 feet tall. They have two toes on each foot with razor sharp claws.

Ostriches typically eat plants, roots, and seeds. They will also eat insects, lizards, and other small creatures.

Since Ostriches can't fly or swim, how do they travel? Well, the answer is simple, they run. Ostriches can sprint up to 43 mph. While they use their wings to make sharp turns. The birds use their powerful legs to run very fast.

Not only do Ostriches use their legs to run but they also use them as weapons. An Ostrich's kick can kill a predator in a single strike. Their predators include, cheetahs, lions, leopards, and spotted hyenas.

Stay tuned for the next...
